

EduNano – Scopia meeting 9.4.14

Participants:

- Yoav – Tech
- Jack – TAU
- Efrat – BIU
- Danilo – POLITO
- Sidney – Weizmann
- Ron – Weizmann
- Nadav – HUJI
- Tirza - HUJI
- Vered – SNI

Partnership agreement signature status:

- Already signed and delivered by: TAU, Shmuel Neeman and BIU.

Courses:

Now we can still change **limited** amount of courses suggested in the proposal by the partners – we need to finalize the courses and provide the curriculum - **Final list of the courses by the end of Passover (titles)**

- **Shmuel Neeman institution will work on the need analysis** regarding the relevancy and impact of the courses among the industrial companies

- Each partner should send the credentials of a contact point (name, surname and email) to be in charge on administration of his institution courses and Jack will create a user for him in Moodle LMS

- Course syllabus should be sent to Jack that will upload them in the Moodle of the project until all the users for the partners will be created on the Moodle.

Everybody should get into the Moodle site and check their courses.

Yoav – the Technion have a problem with the signature, there is an issue with TRDF. Courses – decided: (1) small systems and (2) bionanotechnology

Subtitles for the video – we need a subcontract someone need to lead this process

Yoav will check with BGU for overlapping with one of the courses they suggested

Vered – SNI

Working on the need analysis – will ask that each course developer will specify the course leaning outcomes this will be sent to the industry and will specify their needs as well as other outcomes that were not specified needed in the next years.

Efrat – BIU

Signed the agreement – same courses as in the proposal in English will be recorded without students.

Equipment Purchase:

Jack reported on the Certificate of origin rule problem regarding the equipment purchase. No laptop and video cameras are available in Israel assembled in EU to meet "Certificate of origin rule" requirements. Jack already sent a mail to Slavka and the the project officer.

Nadav and Tirza HUJI

May 26 meeting the Hebrew University – first ECTS workshop.

Translation:

There are two options:

- (1) To find a subcontractor for subtitles and translation and for that we can use unified tender for everyone for the translation (Yoav suggested)
- (2) Maybe to take students for that work (Nadav). Nadav will check this option in HUJI and update us regarding the software they use for subtitles.

Possible problem will be with the budget for translation is not for person hours.

Next meeting before the meeting in HUJI will be in TAU to address technical issues (e.g., video recording of the lessons and Scopia meeting) and working with Moodle – Jack will send a doodle to find a d day for this workshop.

Jack will send everyone the course list again.
